

INTERNSHIP PRESENTATION

Full Stack Development

Presented by:
Daksh Pratap Singh
(Roll No. 2410030168)
B.Tech (Computer Science and Engineering)
IILM University, Greater Noida

Internship Overview

Organization

Thiranex

Role

Intern – Full Stack Development

Duration

20 Aug 2026 – 19 Sept 2026

- Remote / project-based internship.
- Practical projects under industry mentorship.
- Focus on frontend, backend, databases and full-stack workflows.
- Four major development projects were completed and submitted on track.

Objectives of the Internship

- Understand full-stack web application development.
- Strengthen frontend and responsive UI skills.
- Understand backend development and REST-style API integration.
- Learn database integration and persistent data management.
- Practice authentication, authorization and CRUD operations.
- Gain practical experience through project-based assignments.
- Understand the basic workflow of deploying web applications.

Technologies & Concepts

Frontend

HTML, CSS, JavaScript
React.js where applicable

Backend

Node.js / Express.js
Django / Flask

Database

MySQL
PostgreSQL / MongoDB

APIs

RESTful APIs
Backend integration

Security

Authentication
Authorization / role-based access

Other

Responsive design
Deployment & debugging

Completed Internship Projects

1. Personal Portfolio Website

Full-stack portfolio to showcase projects and skills.

2. Task Management Application

Create, update and track tasks with authentication and CRUD.

3. E-Commerce Web Application

Product catalogue, cart, checkout and order management.

4. Blog Platform with Comments

User accounts, post management, comments and REST APIs.

Completed Work – Project Dashboard

1

COMPLETED

Due Date: 27 Aug 2026

Submitted on track

Personal Portfolio Website

Build a full-stack personal portfolio to showcase your projects and skills.

Watch Task Tutorial

Key Features:

- Frontend: HTML, CSS, JavaScript (or React.js)
- Backend: Node.js/Express.js or Django/Flask
- Database: Store project details using MySQL, MongoDB, or PostgreSQL
- Deploy website on a hosting platform (Heroku, Netlify, or Vercel)

Expected Outcome:
Gain experience in integrating frontend, backend, and database for a live project.

Completed Successfully!

2

COMPLETED

Due Date: 03 Sept 2026

Submitted on track

Task Management Application

Develop a task management web application for creating, updating, and tracking tasks.

Watch Task Tutorial

Key Features:

- User authentication & authorization
- CRUD operations for tasks
- Real-time updates (optional: using WebSockets)
- Responsive design for web and mobile screens

Expected Outcome:
Learn full-stack application structure, API integration, and dynamic data handling.

Completed Successfully!

3

COMPLETED

Due Date: 10 Sept 2026

Submitted on track

E-Commerce Web Application

Build a basic online store with product management and order tracking.

Watch Task Tutorial

Key Features:

- Product catalog, add to cart, and checkout functionality
- User login and role-based access (Admin/User)
- Backend APIs for product & order management
- Database integration with MySQL, PostgreSQL, or MongoDB

Expected Outcome:
Gain hands-on experience in building a complex full-stack application with real-world features.

Completed Successfully!

4

COMPLETED

Due Date: 17 Sept 2026

Submitted on track

Blog Platform with Comments

Develop a blogging platform where users can create posts and comment.

Watch Task Tutorial

Key Features:

- User registration, login, and authentication
- Create, edit, delete blog posts
- Comment section for user interaction
- Backend with RESTful APIs and database integration

Expected Outcome:
Learn full-stack development with content management features and user interaction.

Completed Successfully!

Project Features

Personal Portfolio Website

Frontend + backend + database integration and deployment workflow.

Task Management Application

Authentication, authorization, CRUD operations, responsive design.

E-Commerce Web Application

Product catalogue, cart, checkout, user roles and order management.

Blog Platform with Comments

Registration/login, post CRUD, comments, RESTful APIs and database integration.

General Full-Stack Architecture

User / Client

Web pages and responsive interfaces

Frontend

UI, forms, navigation and API communication

Backend / API

Business logic, authentication and CRUD operations

Database

Users, tasks, products, orders, posts and comments

Deployment

Hosting and serving the completed application

Learning Outcomes

Better understanding of the frontend–backend–database relationship.

Practical exposure to responsive web interfaces.

Understanding of backend APIs and CRUD operations.

Experience with authentication and authorization concepts.

Understanding of SQL/NoSQL database integration.

Improved debugging and problem-solving skills.

Experience with real-world style application features.

Basic understanding of deployment and hosting workflows.

Internship Completion Evidence

Date: 20 August 2026

TO,
Daksh Pratap Singh
Intern ID: THX-AUG2026-405

Subject: Offer Letter for Internship in Full Stack Development

Dear **Daksh Pratap Singh**,

Following our selection process, we are pleased to offer you an internship position at **Thiranex**. We believe your skills and enthusiasm will be a great addition to our team.

Internship Role	Intern - Full Stack Development
Commencement Date	20 Aug 2026
Completion Date	19 Sept 2026
Work Mode	Remote / Project-Based

During this tenure, you will work on practical projects under industry mentorship. Your progress will be reviewed periodically, and your performance will determine the successful completion of the internship.

We look forward to a mutually beneficial learning journey. Please confirm your acceptance by starting your onboarding tasks.

This is an electronically generated document. No physical signature is required.
